

## SecurView Mobile => Android Application

1. Download SecurView Mobile from [www.trendnet.com/downloads](http://www.trendnet.com/downloads)
2. Extract the SecurViewMobile\_1.0.apk file and transfer it to your phone.
3. On the phone go to Menu>Settings>Applications and check "Unknown Sources" to allow installation of non-market applications.
4. Use an apk installer on the phone to install the SecurView Mobile application. This will require a third party application. Please refer to your phone's user's guide for further instructions.
5. Start the SecurView Mobile application.

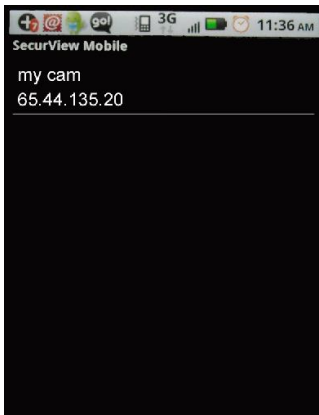

6. Press the Menu button and then press "Add".

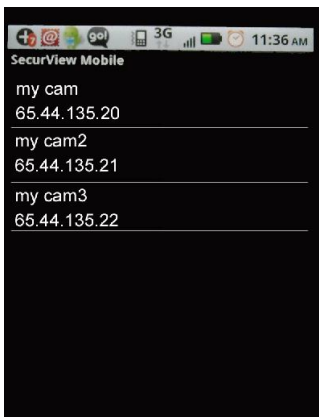

7. Input the camera's settings then press "Save".

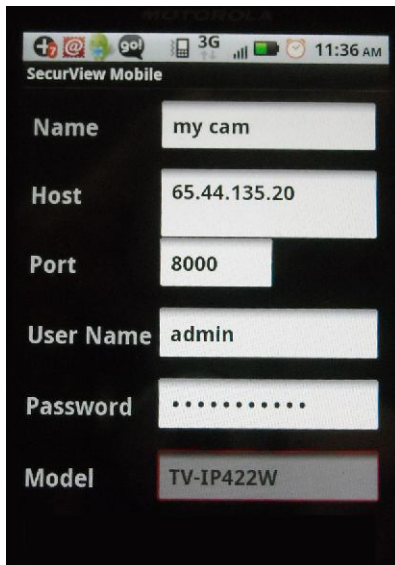

8. The camera will now appear in the camera list.

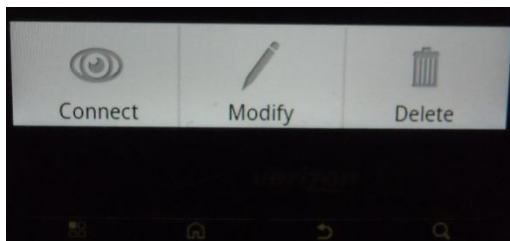

9. Repeat the process to add multiple cameras. Select a camera to view it.

10. The camera information will be displayed.

11. Press the menu button and then press the **Connect** button

12. You will now be shown a live view of the camera.
